

Eaton® PS-386 Synthetic Transmission Lubricant

Get the quality and dependability you deserve with the new standard in gear lube, PS-386.

Eaton's new PS-386 Synthetic Transmission Lubricant prolongs the life of your transmission by reducing gear wear and copper corrosion.

Advanced Gear Wear Test

- PS-386 lubricant excelled in one of the industry's toughest gear wear test. Oils were tested in a rigorous gear wear test that simulates 250,000 miles.
- The gears pictured show the actual gears after the test. The PS-386 lubricant (left gear photo) shows four times less wear than the standard mineral oil (right gear photo).
- Lower gear wear means longer life of the transmission.

Enhanced Copper Corrosion Protection

- PS-386 lubricant excels in preventing copper corrosion. Oils were tested in an advanced 7 day accelerated copper corrosion test that simulates 500,000 miles.
- The copper tubing pictured shows actual copper tubing from a transmission cooler. The PS-386 lubricant (left tubing photo) shows no corrosion while a standard mineral oil (right tubing photo) shows severe copper corrosion.
- Less copper corrosion means longer cooler life and longer transmission life.

EATON®

Eaton Approved Lubricant

PS-386 Synthetic Transmission Fluid

Eaton-approved Lubricant

- Every container of Eaton approved PS-386 Synthetic Transmission Lubricant will have this new symbol on the front label, signifying the fluid meets the stringent specifications of PS-386.
- PS-386 approved lubricants are required for Eaton transmission warranties and Roadranger Extended Protection Plans. See Eaton Warranty Guide TCWY0900 for more details.

APPROVALS

Eaton PS-386 Synthetic Transmission Fluid is approved for these OEM specifications:

- Eaton PS-386 (supercedes PS-164 Rev 7)
- Mack TO-A Plus
- Navistar MPAPS B-6816 Type II
- API MT-1

PS-386: Fully Synthetic Eaton-approved Lubricant

Benefits

- Extended drain intervals up to 500,000 miles.
- PS-386 lubricant can improve fuel economy by 1.5 percent.
- Excellent gear and bearing protection.
- Extreme hot and cold temperature performance reduces start-up wear.
- Improved shear stability allows for the use of a lower viscosity fluid without increased gear wear.
- Backed by the Roadranger network – the nation's leading support system for drivetrain components – providing unequalled protection, support, and training from experienced industry professionals.
- Eaton PS-386 Synthetic Transmission Lubricant is available in the following:
 - Bulk
 - Totes 1900 lbs.
 - Drums 375 lbs.
 - Keg 110 lbs.
 - Pails 33 lbs.
 - Gallon case (4 x 1 gallon container) 28.68 lbs.
- Meets OEM factory fill specifications.
- Designed specifically to provide optimum performance in Eaton Automated Mechanical Transmissions.
- PS-386 supersedes PS-164 rev 7.
