

NEW PRODUCT RELEASE

MAXUS Aluminum Wheels

RS7128MADB 22.5 x 8.25 PCD 285.75 x 10
MAXUS ES-3 (Super Bright)

ES-3 offers protection against oxidation and corrosion with an easy-clean finish.

ES-3 Coating Tech

- Smooth surface with good insulation, reduce dust absorption caused by static electricity.
- Easy to maintain, only need to spray the appropriate wash liquid or soapy water, and use water to wash.

ES-3

Regular Coating

1 Glossiness (20°) ≥ 1,200G

2 Corrosion Resistance ≥ 1,200 hours
(Salt Spray Testing)

Delaying the oxidation progress of the surface

3 Adhesion Test

Excellent adhesion after film formation, won't come off easily

4 Film Thickness

High surface hardness ≥ 4H, the surface of the protective film will not be scratched

5 Thickness Gauge

Film formation between 8-15 microns, uniform wheel protection

Brand	Thickness	Hardness	Glossiness	Corrosion Resistance (Salt Spray Testing)
Maxus ES-3	8-15	4	≥1,200G	1200

Warranty

5 Years
