

MaxiSTOCK is MaxiPARTS' inventory and job management platform, designed to give you real-time visibility and control over your parts usage, vehicle spend, and workshop activity.

Built with and for customers, this solution focuses on making everyday tasks faster and easier – from scanning and allocating parts, through to tracking job history and reporting on usage.

What Makes MaxiSTOCK Different?

- Real-time visibility of parts usage across your workshop
- Track spend by job, vehicle, or asset
- Improved reporting and insights to support better decision making
- Faster job processing with integrated scanning and allocation
- Reduced admin with automated stock replenishment

At its core, MaxiSTOCK allows you to:

- Create and manage jobs linked to vehicles or assets
- Scan and allocate parts in real time
- Track usage and costs at a job, vehicle, or account level
- Submit completed jobs directly through to MaxiPARTS for order processing

Powerful Reporting at Your Fingertips

- Track spend by vehicle, fleet, or location
- View usage trends over time
- Identify high-usage parts and cost drivers
- Export reports for internal analysis and budgeting
- Gain visibility to reduce waste and improve stock control

Benefits

- No cost to your business
- Fully automated replenishment
- Stand-alone system – no IT integration required
- Simple and flexible to suit your operation
- No long-term commitments

How It Works

-  1. MaxiPARTS sets up and barcodes your stock
-  2. You scan parts as they're used
-  3. Usage is sent directly to MaxiPARTS
-  4. Orders are generated, invoiced, and delivered
-  5. Reporting is available based on your requirements

What can it scan?

Scan and Track What Matters:

JOB NUMBER

MANAGER'S NAME

VEHICLE NUMBERS

PURCHASE ORDER
NUMBER
